8. Background:

At the January 18, 2005 Regular Meeting, under Commissioner Items, the Board discussed refraining from considering any Comprehensive Plan changes in the DR/GR until the ongoing study identifying the hydrological characteristics and the potential mining areas is completed and brought back for Board review. Staff was also instructed to bring this item to the March Management & Planning meeting. This issue was included at the M&P meeting and staff informed the Board that there were no amendments pending. This issue was again discussed at the Regular Meeting of the Board on February 22, 2005. In order to formalize the Board's intent, this issue is being scheduled as an agenda item.
