EXHIBIT B
CONTRACT CONDITIONS BETWEEN
MEADOWS OF ESTERO CONDOMINIUM, INC.
AND LEE COUNTY

THE FOLLOWING conditions are agreed to by SHELBY HOMES, (hereinafter referred to as "USER"), and LEE COUNTY (hereinafter referred to as "COUNTY"), for the use of reclaimed effluent water. Conditions set forth in this Exhibit B are in accordance with the Agreement and are meant to meet the specific needs of the individual USER and the COUNTY.

All conditions of this Exhibit B are specifically added to and made part of this Agreement.

Location of Property and Distribution Points:

The property identified by the USER to receive reclaimed water is described in Exhibit A of the Agreement. The distribution point (or Point of Delivery) to where the County is to deliver the reclaimed water shall be considered a point inside the easement shown in Figure A-1.

Quantity of Reclaimed Water:

The COUNTY will deliver and the USER shall accept a monthly average flow of .07 million gallons per day (MGD) reclaimed water. Availability of the reclaimed water shall be determined by the COUNTY based upon: flow into the treatment facility, quality of the reclaimed water, and/or priority level as established in the Agreement. The maximum rate available to the USER, under these adverse conditions, will be twice the average daily flow rate of MGD, or .14 MGD.

Operation and Maintenance Practices:

The USER will apply reclaimed water in accordance with all appropriate Local, State, and Federal rules and regulations.

Reclaimed water irrigation systems shall protect human health and the environment, which includes, but is not limited to, the following:

1. Appropriate warning signs shall be posted around the sites utilizing reclaimed water by the USER to designate the nature of the water and its non-potability.
2. The USER will also take all reasonable precautions, including signs and labeling, to clearly identify reclaimed water systems to prevent inadvertent human consumption.
3. The USER shall ensure that no inter-connections are made between the reclaimed water system and other water systems, which includes the installation of irrigation check valves on existing wells that are to remain connected to the irrigation system for reclaimed water.
4. A distance of 500 feet should be maintained between the periphery of the reclaimed water irrigation system application site and any existing or approved (but not yet constructed) shallow drinking water wells.
5. A distance of 1,000 feet shall be maintained between potable water wells and holding ponds which are incorporated into the irrigation system.

6. The USER shall give approval to the COUNTY to conduct soil borings and locate monitoring wells at the perimeter of the property in areas agreeable to the USER so as not to interfere with USER'S operations. These monitoring wells shall be installed and sampled at periodic intervals by the COUNTY at the COUNTY'S expense.

COST ALLOCATION

All costs for operating and maintaining the USER'S irrigation distribution system shall be exclusively paid by the USER.
