C) BoCC Goals

D) Analysis

Lee County owns and operates a Solid Waste Resource Recovery Facility. During unplanned outages at the Solid Waste Resource Recovery Facility and when incoming waste volumes exceed processing capacity, waste is sent to the permitted landfill for disposal. The remaining landfill site life can fluctuate based on the Solid Waste Resource Recovery Facility operations, incoming waste receipts and other significant impacts such as hurricane recovery. The contingency disposal contract will provide a reliable back-up to the landfill for disposal of waste not processed by the Solid Waste Resource Recovery Facility storm and hurricane debris.

This contract is for use on an as-needed basis for an initial term of three-years with up to three additional one-year renewal options. This is a new annual contract for Lee County.

The current rate is \$43.50 per ton, and expenditures related to the Contingency disposal services are anticipated to increase after FY21, within the approved budget for future years
