Hurricane Irma Post Storm Report #13

At this time, Island Water Association (IWA) reports numerous leaks island wide; plus have connectivity issues to three (3) booster stations. We are working collectively with Lee County Emergency Operations Center to address. Water service is expected to be intermittent, or off, until these issues are addressed.

At this time, we cannot guarantee any level of service for utilities or provide any prediction of continued reliability or exact time services will be restored. We can assure you we are working as fast as humanly possible to restore basic services.

Be smart....Be safe!
